EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Calderone on 7/1/2004.

The application has been amended as follows:

At the end of claim 1, --wherein the activity-affecting impurity in the basic metal oxide catalyst is, or contains, sulfur, phosphorus, at least one transition metal or combination thereof— has been inserted.

Claim 4 has been canceled.

Dependency of claim 5 has been changed to from "4" to --1--.

At the end of claim 20 --as measured by the isomerization of 1-butene to 2-butene under the isomerization conditions, wherein the activity-affecting impurity in the basic metal oxide catalyst is, or contains, sulfur, phosphorus, at least one transition metal or combination thereof-- has been inserted.

At the end of claim 24, --as measured by the isomerization of 1-butene to 2-butene under the isomerization conditions, wherein the activity-affecting impurity in the basic metal oxide catalyst is, or contains, sulfur, phosphorus, at least one transition metal or combination thereof-- has been inserted.

Claim 27 has been canceled.

Art Unit: 1764

Dependency of claims 28-32 has been changed from "24" to --27--.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or render obviousness a process, as called for in claims 1, 20, and 24, a process for isomerization of olefin in the presence of an activated catalyst containing basic metal oxide and an amount of activity-affecting impurity which does not exceed that amount as called for in the claims. One having ordinary skill in the art who studies the specification of this application, specifically examples, must recognize that applicants of this application are the first to discover the minor amount of these impurities strongly affecting the performance of the catalyst.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thuan D. Dang whose telephone number is 571-272-1445. The examiner can normally be reached on Mon-Thu.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on 571-272-1444. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
